

Hashim Hameem

Full-Stack Developer & Mobile App Specialist

I build production web platforms, mobile apps, and developer tools with Next.js, React, Supabase, PostgreSQL, Flutter, and applied AI search. Recent work: a citation-safe Arabic scholarly search engine, a multi-role learning platform, a school management system, an editorial storefront, and open-source Flutter packages.

CORE STACK

Mobile

Flutter, Dart, Riverpod, Provider, Material Design 3

Web

Next.js, React, TypeScript, Tailwind CSS, Vite, Framer Motion

Backend

Supabase, PostgreSQL, Firebase, Node.js, Express, FastAPI, SQLite, REST APIs

AI & Search

Hybrid lexical + semantic retrieval, BM25 / FTS5, sentence embeddings, RRF

Security

Vulnerability analysis, responsible reporting, OWASP review, access-control testing

STRENGTHS

Clean architecture

Responsive UI

Mobile release

Admin systems

Open source

Payment flows

Security analysis

RBAC & multi-tenant

i18n / RTL

EDUCATION

B.E. Computer Science & Engineering

RNS Institute of Technology, Bangalore

SELECTED PROJECTS

Fiqh.ai

Next.js · FastAPI · SQLite FTS5 · Embeddings

Citation-safe search over 115k+ passages of classical Hanafi Fiqh texts: hybrid BM25 + Arabic embedding retrieval fused with RRF, exact volume/page citations, split-screen reading pane, and Arabic text-to-speech.

Nile Learn

React · Vite · Supabase · Moodle

Learning platform with public course discovery, six role-based portals, server-enforced RBAC, i18n/RTL, and Moodle-backed quizzes, attendance, and grading.

Faiz E Aam School Platform

Next.js · Supabase · PostgreSQL

Modular-monolith school system: public site, admissions, guardian portal, and staff workspace with fees, results, timetables, notices, and append-only audit trails.

Poshsaaz

React · Vite · Framer Motion · Cloudinary

Editorial storefront for a Kashmiri handcrafted floral-accessories brand with scroll-driven motion, a Cloudinary media pipeline, and WhatsApp ordering.

My Rental Find

Next.js · Stripe · AI · SaaS

Property-management SaaS for modern managers with tenant workflows, maintenance tracking, leasing, payments, operational dashboards, and AI-assisted insights.

BillExpert

Flutter · Hive · PDF · AdMob

Professional invoice and billing app with multi-currency support, client records, PDF templates, local-first storage, and a polished mobile workflow.

IQRA Library App & Dashboard

Flutter · React · Supabase · QR

Mobile app and admin dashboard for library access with QR entry/exit, member records, role-based operations, analytics, and real-time sync.

Flutter Welcome Kit & Islamic Learning Apps

Flutter packages · Firebase · AI APIs

Published onboarding/guided-tour package and a suite of mobile learning apps covering prayer times, Qibla, tafseer sources, offline reading, and bilingual AI poetry insights.

EXPERIENCE FOCUS

Independent Full-Stack & Mobile Developer

Product design, implementation, launch, and maintenance

- Built multi-role web platforms (learning, school management) with server-enforced RBAC, Supabase/PostgreSQL data models, and audit trails.
- Designed a hybrid lexical + semantic retrieval pipeline for classical Arabic texts with exact, verifiable citations.
- Shipped cross-platform Flutter apps and web dashboards from requirements to release, including auth, payments, PDF generation, and admin tooling.
- Created reusable package APIs and open-source projects for Flutter developers.

Cybersecurity Analyst & Open-Source Security Research

Vulnerability discovery, practical web security review, and responsible reporting

- Identified security issues across public and open-source projects, including quran.com, quranreflect.com, and seekersguidance.org.
- Reviewed authentication, authorization, exposed workflows, data handling, and user-facing web surfaces for practical risk.
- Combined development knowledge with security analysis to find issues that affect real product behavior and user trust.
